WHY THIS PROGRAMME?

IMPROVE LOGISTICS

Strengthen logistics planning and operational coordination.

REDUCE DISRUPTION

Identify transportation and distribution risks.

ENSURE DELIVERY

Improve fleet, route and distribution performance.

OPTIMIZE COSTS

Increase visibility, productivity and resource utilization.

IN-HOUSE DELIVERY OPTIONS

- ✓ Onsite at client premises
- ✓ Live virtual instructor-led format
- ✓ Hybrid delivery format
- ✓ Customized duration based on organizational requirements

INDUSTRIES WE SERVE

- ✓ Logistics & Transportation
- ✓ Warehousing & Distribution
- ✓ Manufacturing
- ✓ Oil & Gas
- ✓ Infrastructure
- ✓ Retail & FMCG

COURSE OVERVIEW

Modern logistics and distribution operations face transportation disruptions, rising operational costs, supply chain complexity, delivery performance pressures, and evolving customer expectations. Organizations need greater logistics visibility, transportation coordination, distribution planning, and operational responsiveness.

This in-house program strengthens logistics and distribution capability through practical approaches to logistics planning, transportation management, fleet coordination, distribution optimization, performance monitoring, and logistics risk management.

Business Challenges Addressed

- > Transportation inefficiencies
- > Distribution delays and operational bottlenecks
- > Rising logistics costs
- > Delivery performance inconsistency
- > Weak logistics visibility
- > Distribution coordination gaps
- > Fleet utilization inefficiencies
- > Logistics disruption exposure
- > Poor route planning
- > Operational continuity pressures

Key Learning Outcomes

- > Improve logistics planning and operational coordination
- > Strengthen transportation and distribution efficiency
- > Improve logistics visibility and operational control
- > Optimize delivery and distribution performance
- > Support operational continuity through logistics management
- > Improve fleet and transportation coordination
- > Identify logistics-related operational risks
- > Strengthen logistics monitoring and reporting
- > Improve customer service through efficient distribution
- > Enhance logistics operational decision-making

WHO SHOULD ATTEND

Logistics Managers

Distribution Supervisors

Transportation
Coordinators

Supply Chain
Professionals

Warehouse Managers

Fleet Management

Operations Supervisors

Delivery & Distribution

Inventory & Logistics

Operational Planning

TRAINING METHODOLOGY

Interactive learning approaches support practical application and can be customized to the organization's environment, industry, and participant experience.

ID Instructor-Led Discussions

ICS Industry Case Studies

TPE Transportation Planning
Exercises

GW Group Workshops

DCD Distribution Coordination
Discussions

OSA Operational Scenario
Analysis

POE Practical Operational
Exercises

TLA Team-Based Logistics
Activities

COURSE MODULES

01 Logistics & Distribution Fundamentals

- Principles of logistics management
- Distribution operations overview
- Transportation and logistics networks
- Operational flow coordination
- Logistics performance challenges

02 Transportation & Fleet Management

- Transportation planning principles
- Fleet coordination approaches
- Route optimization concepts
- Delivery scheduling considerations
- Transportation risk awareness

03 Distribution Operations & Coordination

- Distribution center operations
- Order fulfillment processes
- Distribution workflow coordination
- Delivery performance management
- Customer service considerations

04 Logistics Visibility & Performance Monitoring

- Logistics tracking principles
- Operational monitoring approaches
- Logistics KPIs and reporting
- Distribution performance analysis
- Operational visibility improvement

05 Logistics Risk & Operational Continuity

- Transportation disruption risks
- Distribution continuity planning
- Logistics contingency approaches
- Operational recovery coordination
- Supply chain disruption awareness

06 Cost Optimization & Operational Efficiency

- Logistics cost drivers
- Distribution cost improvement
- Transportation resource utilization
- Operational productivity enhancement
- Cost-control considerations

07 Continuous Improvement in Logistics Operations

- Logistics process improvement
- Distribution optimization approaches
- Operational review techniques
- Logistics technology trends
- Building long-term logistics capability

TAILORED TO YOUR NEEDS

Modules can be customized to align with your industry, operational environment, and participant experience.
